-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 September 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ponton.

Ponton shows a containing means 10; filling opening 22; dispensing opening 29; dispensing means 30 being a pump, the pump having a body, collar seen in Figure 3A, tube 33, dispensing head 34, and hole in nozzle 9; control means 7; casing means 2; product dispensing aperture 8; container mounting opening in the bottom of the casing that allows for the insertion of the reservoir; closure means 24; reservoir 12; faces 15, 11; rectilinear fixing means on both the casing and reservoir seen in Figure 3A and discussed as a friction fit in column 7, lines 51-58; and closing means 25. Blow molding in a single piece is a product-by-process limitation, and as there appears to be no functional difference from the Ponton reservoir other than aesthetics, the claimed

limitation is met. However, it would have been obvious to blow mold the reservoir in a single piece as it would make the reservoir stronger and would be easy to manufacture.

4. Claims 13, 14 and 26-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ponton.

Ponton has been discussed above, but lacks the pivoting wall having a hinge and the shape of the container. It would have been obvious to one of ordinary skill in the art to provide the closure means 24 as a pivoting wall as it would allow for expedient and easy refilling of the device and is an obvious way not to lose or misplace the closure while filling as the closure would remain attached to the device. Further, the faces and parallelepiped shape would have been obvious in order to provide for easier packaging and stacking of the product.

Response to Argument

5. Applicant's arguments filed 9/28/2005 have been fully considered but they are not persuasive. Applicant contends that Ponton does not show a blow molded, single-piece reservoir. This has been addressed in the above new rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3754

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
